Setting trends through innovations. Convincing through quality.

MEDISANA defines itself as an innovative brand featuring comprehensive health competence. Our brand and product strategies reflect our clear and consequent focus on the consumer as well as evolving market trends. We aim to develop innovative product concepts and bring them to marketing maturity. Which is how we won the renowned German Brand Award 2018 in the category "Industry Excellence in Branding/Health & Pharmaceuticals", for our successful brand management.

The key indicator for quality: Customer satisfaction.

This award means a lot to us and shows that people use our brands and the products we develop to improve and enhance their health, fitness and wellness. This motivates us to continue establishing new technological trends on the health care market. It is a matter of course and pride that our products meet the criteria of the World Health Organization (WHO), the Medical Devices Directive (MDD), as well as various consumer associations. But for us at MEDISANA, the key indicator for quality and success remains the satisfaction of our customers.

The best for our environment – and for us all.

Thinking and acting sustainably is an essential and enduring aspect of how we at MEDISANA see our business, products and services. We know society is becoming increasingly aware and acting more consciously and responsibly as well, and it reflects in consumers welcoming sustainable developments. We strive to support these views and values through the use of natural materials in our products. Health care is, after all, in itself a form of sustainability in thought and deed.

High-quality, natural materials such as bamboo and cork impart fresh elegance to your personal surroundings whilst providing a sense of cosiness and warmth.

Whether in the living room, kitchen or bath, our products complement every decor and atmosphere.

Natural materials – more than just a trend.

For example, take our personal scale PS 440 and our aroma diffuser AD 625, both made of natural bamboo. The use of natural materials in sports, for example yoga, is becoming more popular. Our new yoga mat is also partly made of cork.

The smart way to stay healthy.

MEDISANA's connected health management.
Innovative and comprehensive. MEDISANA connects high-quality analysis products such as body composition scales or blood pressure monitors with innovative digital technology. "Connected health" is more than just a buzz word, it is the concept our VitaDock+ app brings together.

More and more people want to keep an eye on their health themselves. And the precondition for that is easily accessible vital signs data and the information around it. We at MEDISANA feel that simply displaying and storing results is not enough. Our innovative VitaDock+ app acts as the centre of your own health management network. All your measured values are sent via Bluetooth® or USB to your tablet, smartphone or PC where they are then analysed and saved – always at your fingertips. The perfect tool for monitoring your vital signs and health yourself, management and prevention in one.

Connected health is booming.

Almost every second smartphone owner is either already using a health/fitness app or is willing to do so, according to a survey conducted by the trade association Bitkom in 2017. Not surprising, as apps and wearables have become daily companions for many people. Their advantage: They are not just used after an affliction or disease has become evident, but for monitoring overall personal health and its benchmarks in the everyday.

**Connected Health
by MEDISANA. Mobile
health management.**

We put mobile health management in our focus early on, and our first VitaDock app was already introduced in 2010. Now we offer our customers a sophisticated system of high quality connected health products and services. Information, comparisons and analyses are always readily available, mobile and online.

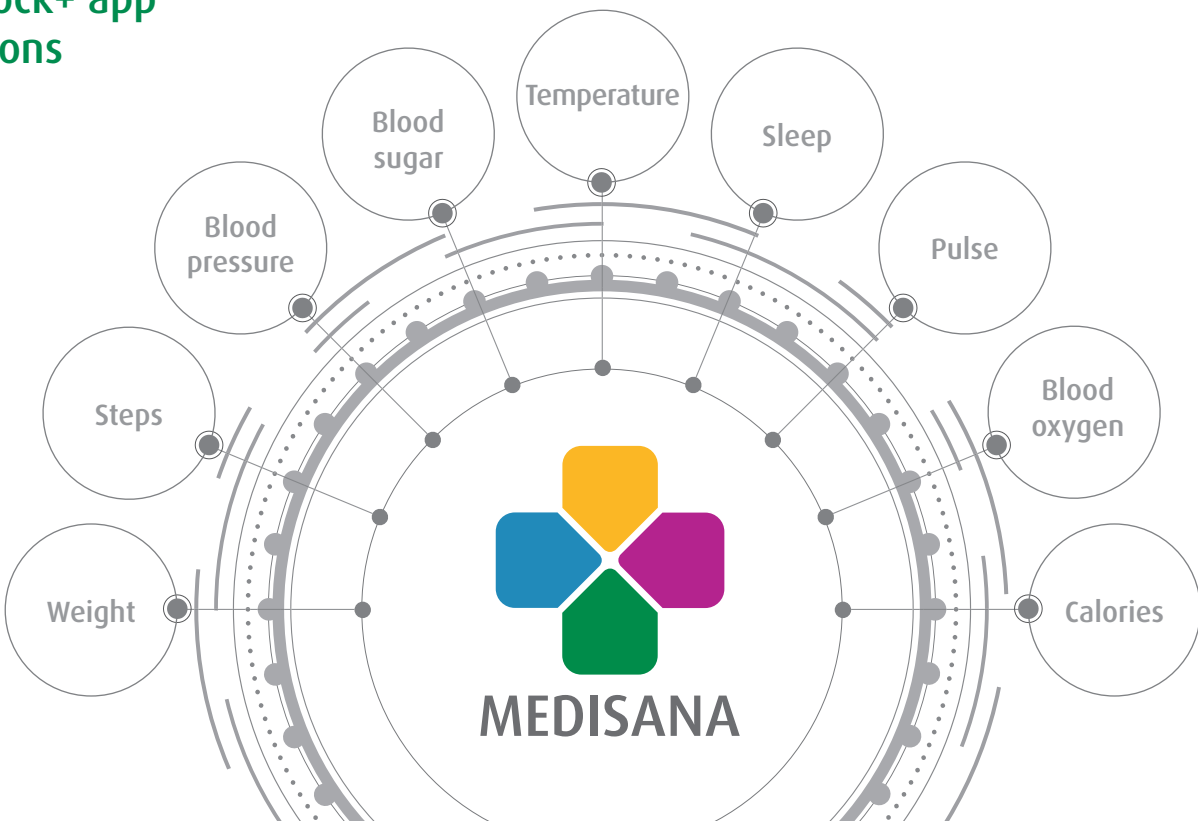

VitaDock+ Facts and figures:

- ▶ **Approx. 700.000** registered VitaDock+ users
- ▶ **Over 10.000** new registrations per month
- ▶ **Over 1 mio.** new health measured values per month

Over 40 mio. recorded measured values
Over 17 mio. weight measured values
Over 11 mio. activity level calculations
Over 8 mio. blood pressure values
Over 2 mio. blood sugar values

Every month the number of measured values increases by 1 million, that is over 30,000 values tested per day.

Overview of VitaDock+ app functions

What makes me feel
sure
about my **health?**

Leon, 43, enjoys the comfort of knowing his vital signs.

Innovative health
monitoring – Made for Life.

Monitoring is the first step to improving someone's own health. More and more people are now aware of this and are taking responsibility for their own health. About a third of the population uses a fitness or health tracking device or a health app on their mobile phones to record their health data and vital signs*. MEDISANA supports this trend towards more personal responsibility through innovative products and services that improve and simplify looking after your health. Yourself.

* According to a survey carried out by the trade association Bitcom on the use of wearables

Good monitoring.
Good feedback. Good health.

Simon, 45, likes to keep an eye on his blood pressure.

High blood pressure is a disease that can go undetected for quite some time. There may not be any conspicuous symptoms, but it does pose a looming danger nonetheless. Regular monitoring keeps you in touch with your values and health.

Ask your doctor to show you how to measure your blood pressure correctly. Then measure it yourself daily, always at the same time. Make sure the cuff is correctly positioned on your upper arm or wrist. During the reading, keep the cuff level with your heart. Your blood pressure readings should be lower than 135/85 mm Hg, according to the WHO scale (on the right).

Take your blood pressure regularly and at the same time.

Do you really know or just guessing?
What are your blood pressure values?

You can only really be certain regarding your blood pressure if it is accurately and regularly measured. Any doctor can do it. But so can you, and at home too. Find out for sure: Where are you on the scale?

Classification	systolic (mmHg)	diastolic (mmHg)
ideal	under 120	under 80
normal	120 – 129	80 – 84
high-normal	130 – 139	85 – 89
Stage 1 Hypertension (mild)	140 – 159	90 – 99
Stage 2 Hypertension (moderate)	160 – 179	100 – 109
Stage 3 Hypertension (severe)	180 or higher	110 or higher

Health control

Blood pressure monitoring made simple and sure:
At a glance thanks to the large display characters.

BU 540 CONNECT
Upper arm blood pressure monitor

Precise blood pressure measuring on the upper arm

250 memory slots each for two users

Extra-large display numbers for easy reading

Calculates the average of the last 3 stored readings

Classification according to WHO* recommendations

Certified medical product**

Data transfer via Bluetooth® Smart (4.0) to the VitaDock+ App for iOS and Android*

* World Health Organization ** Certified according to MDD (Medical Device Directive) guidelines *** Bluetooth® 4.0 kompatibel mit VitaDock+ App ab Apple (iOS 7.0), iPhone® 4s, iPod Touch® (ab 4. Gen.), iPad 3, ab Android 4.3

Every third adult is under pressure. High blood pressure.

Hypertension is a widespread disease affecting millions, many of which are not even aware they are at risk. Regular monitoring at home helps to detect changing values at an early stage.

Almost every third adult between the ages of 18 and 79 suffers from hypertension, according to the Robert Koch Institute (RKI), which based their examination on a systolic pressure of 140/90 mmHg. However, it is estimated that considerably more people are affected by the risks of elevated blood pressure levels. Exceedingly few people notice it or register it as a problem. Generally speaking, anyone can get high blood pressure, as it is mostly a matter of lifestyle.

High blood pressure is very widespread.

The BU 512 makes keeping an eye on your blood pressure easy and precise. Reliable and accurate readings are taken on the upper arm and displayed in extra-large characters, making the BU 512 the perfect instrument for older or visually-impaired people.

NEW

BU 512
Upper arm blood pressure monitor

- Precise blood pressure measuring on the upper arm
- Display shows systole, diastole, pulse, date and time
- 90 memory slots each for two users
- Classification according to WHO* recommendations
- Certified medical product**

Leon, 43, knows he can trust the BU 535 VOICE.

With
**VOICE
OUTPUT**

Our innovative upper arm blood pressure monitor BU 535 VOICE: See for yourself. Hear it too.

Normal blood pressure values are roundabout 120 to 80 mmHg. Daily monitoring quickly shows if deviations are just short-term fluctuations or prolonged tendencies. The upper arm blood pressure monitor BU 535 VOICE displays the results in large, easy-to-read characters, and thanks to the integrated voice output function, you also have the option of having them spoken aloud to you. In addition, the average of the last three readings is calculated, giving you a good overview of your state of health.

BU 535 VOICE Upper arm blood pressure monitor

- Precise blood pressure measuring on the upper arm
- Voice output in 6 languages
- Arrhythmia indicator
- 120 memory slots each for two users
- Calculates the average of the 3 last stored readings

More than **just** looking good.

No weighing scale can make you thinner. But the BS 460 is a reliable and well-designed companion for a healthier life.

Lights on – automatically, the moment you step on the BS 460. It accurately measures your weight and analyses body fat and water percentage as well as muscle and bone mass. It also calculates your daily calorie requirements. The display is detachable for easy reading. The BS 460 is an eye-catcher in any modern bathroom.

Detachable Display

NEW

BS 460
Body analysis scale

- Determines weight, body fat and water, muscle and bone mass
- Integrated calorie requirement analysis
- Blue LED surface lighting
- Detachable display
- 4 high-precision strain gauge sensors for exact results
- Large stainless-steel electrodes
- Up to 180 kg

With blue LED-light

VitaDock+ App

NEW

BS 450 CONNECT
Body analysis scale

- Measures weight, body fat and water, muscle and bone mass
- Calculates the BMI value
- Vapor-deposited ITO-electrodes
- LED display invisible when not in use
- Data transfer via Bluetooth® Smart (4.0) to the VitaDock+ app for iOS and Android and to VitaDock Online
- Up to 180 kg

5 typical weighing mistakes:

1. Weighing yourself in clothes

Because just a pair of jeans can already weigh 600 to 1000 g.

2. Weighing yourself every day

It can frustrate anyone. A weigh-in day once a week is the better alternative.

3. Weighing yourself in the evenings

All the undigested food and drink from over the day will tip the scales. Better to weigh yourself in the morning.

4. Weighing yourself directly after getting up

Doctors recommend drinking a glass of water and using the toilet first.

5. Getting off the scales frustrated

Weight fluctuation is absolutely normal, no reason for disappointment.

Design and high-end technology perfectly united.

Our body analysis scale BS 450 CONNECT is exceptionally and yet subtly elegant; its LED display only becomes visible during weighing. ITO electrodes guarantee the accurate determination of body fat, body water, muscles and bone mass. The results are automatically saved and can be sent via Bluetooth® Smart (4.0) to the Vita Dock+ smart phone app and/or to Vita Dock Online. The advantage: the combination of measuring values and the possibility of commenting them.

The good feeling of knowing for sure.

Up to
250 kg

NEW

PS 470 XL personal scale

- Extra-large LCD Display with large numbers
- Maximal load capacity 250 kg
- 4 high-precision strain gauge sensors for exact results
- Convenient step-on activation

Stepping on the scales is part of many people's daily routine. Our XL personal scale PS 470 can make it easier for you.

Weighing yourself a couple of times over the week is for some a ritual that gives a sense of security. Is my weight OK? Where I want it to be? Am I losing weight? Gaining?

Weighing yourself safe and sure.

The XL personal scale PS 470 has an extra-large LCD-Display with large characters and can even be easily read under difficult lighting conditions. Its flat construction and large standing area guarantee stability and safety.

Facts about overweight and obesity*

Worldwide obesity has nearly tripled since 1975.

The amazing grass bamboo

Bamboo is a grass – fast-growing and sustainable. The special advantage: Bamboo is an extremely stable material and therefore the ideal natural choice for our scales.

No more cold feet in the bathroom. The decorative personal scale PS 440 is made of real bamboo, looking – and feeling – great.

A design-highlight in your bath. The bamboo scale combines state-of-the-art weighing technology with the natural beauty of bamboo. Another special feature is the invisible display that only lights up when in use. This scale actually makes it a treat to step on and see your weight improving from sports and healthy eating.

Magic LED Display

NEW

PS 440 Bamboo personal scale

- Decorative weighing scale made of bamboo
- Invisible LED display that only lights up white when in use
- Energy-saving automatic switch-off
- 4 high-precision strain gauge sensors for exact results
- Convenient step-on activation

BS 450 CONNECT
Body analysis scale

Connect device with LED display

- Measurement of weight, body fat, body water, muscle percentage and bone weight
- Determination of the BMI value
- Integrated calorie requirement analysis (BMR)
- Automatic recognition of up to 8 users
- Data transfer via Bluetooth® Smart (4.0) to the VitaDock+ app for iOS and Android and to VitaDock Online*

Technical data

- Ultra high-quality ITO electrodes
- Convenient „step-on“ activation
- Invisible LED display that only lights up when in use
- Switchable between kg, lb and st
- 4 high-precision strain gauge sensors for accurate results
- 30 memory slots for each of the 8 users
- Body analysis not applicable for persons with implants (e.g. pacemakers)
- Maximum capacity: 180 kg
- Incl. batteries (4 × 1.5V AAA)
- Sensor touch buttons
- Closed underbody for better a stability

Size: approx. 31.9×31.9×2.3 cm
Weight: approx. 1.7 kg
Display size: 7.4×2.9 cm
Weight display: up to 180 kg, 396lb, 28 st 4lb

Body analysis scale

Our Bestseller

- Measurement of weight, body fat, body water, muscle percentage and bone weight
- Determination of the BMI value
- Integrated calorie requirement analysis (BMR)
- Automatic recognition of up to 8 users
- Data transfer via Bluetooth® Smart (4.0) to the VitaDock+ app for iOS and Android and to VitaDock Online*

Technical data

- High-quality stainless steel electrodes
- Convenient „step-on“ activation
- Large easy-to-read LCD display
- Switchable between kg, lb and st
- 4 high-precision strain gauge sensors for accurate results
- 30 memory spaces for each of 8 users
- Body analysis not applicable for persons with implants (e.g. pacemakers)
- Maximal capacity: 180 kg
- Incl. batteries (3×1.5V AAA)

Size: approx. 30×30×2.3 cm
Weight: approx. 1.6 kg
Display size: 7.3×4.8 cm
Weight display: 5 to 180 kg
Graduation: 100 g, 0.2lb, 1/4lb
Batteries: 3×1.5V (AAA)
Article No.: 40444
EAN: 40 15588 40444 3
Warranty: 3 Years

TARGET SCALE® 3
Body analysis scale

Athlete mode for athletes

- Precise determination of weight (up to 180 kg), Body Mass Index (BMI), kcal per day, calculates percentage of body fat and water as well as muscle and bone mass
- Automatic recognition of up to 8 users
- Data transfer via Bluetooth® Smart (4.0) to the VitaDock+ app for iOS and Android and to VitaDock Online*

Technical data

- Lighted rings depict the difference between current and target weight
- Automatic recognition and individual definition of target weight
- Large easy-to-read LCD display with white luminous digits
- Athlete mode for athletes
- Stores up to 240 measurements in the scale memory (automatic data transfer to smartphone)
- Maximal capacity: 180 kg
- Incl. batteries (4×1.5V AA)

Size: approx. ø 36×4.75 cm
Weight: approx. 2 kg
Display size: 7×5 cm
Weight display: 5 to 180 kg
Graduation: 100 g, 0.2lb, 1/4lb
Batteries: 4×1.5V (AA)
Article No.: 40413
EAN: 40 15588 40413 9
Warranty: 3 Years

* Bluetooth® 4.0 compatible with VitaDock+ App as of Apple (iOS 7.0), iPhone® 4s, iPod Touch® (as of 4 Gen.), iPad 3, as of Android 4.3

Health control

What can I do for my
own health?

Annika, 33, is glad she
can care for herself.

Effective therapy products –
Made for Life.

Most people take an active interest in their own personal health. Sports, fitness and wellness are firmly rooted aspects of their health care. The medical doctor still remains the utmost authority, but people are increasingly better-informed and more pro-active regarding their sense of well-being. We support this awareness and take responsibility for personal health with therapy products that gently target health care needs.

Gentle to the scalp. Tough against lice.

Catching scalp lice has nothing to do with poor hygiene. Lice and nits are widespread, all year round, especially in kindergartens, schools and institutional facilities.

Scalp lice cannot jump, they climb. That is why contamination only takes place where heads or hair come together. The symptoms are itching, redness, sleeplessness. Too often the solution is an unpleasant procedure using chemical agents or painful removal with conventional lice combs.

Dealing with lice consequently.

The electric lice comb LC 870 is the easy, safe and more comfortable method of removing scalp lice. Lice and nits are killed by electric impulses whilst combing through the hair, totally free of side effects.

LC 870 Electric lice comb

- Integrated LED light makes scalp lice easier to find and remove
- Simple combing the hair kills scalp lice and nits
- No side effects – no chemicals
- Also suitable for dogs and cats

SUITABLE
FOR ANIMALS
LED-LIGHT

Respiratory diseases are on the rise, and the causes are many. Our ultrasonic inhaler IN 525 gives reliable relief.

Adverse environmental conditions or physical stress can lead to mucous membrane swelling in the bronchial tubes or lungs. As a result, breathing becomes a chore. Especially in times of humid weather, many people face the strain of respiratory infections and colds.

Inhalations provide reliable relief from respiratory afflictions.

The IN 525 employs mesh-technology for finest micro-membrane nebulization and is particularly effective through the high presence of respirable aerosol. Its use is soothing and relieving for children and adults alike.

Takes the pressure out of breathing.

NEW IN 525 Inhaler

- Specific treatment for ailments of the upper and lower respiratory tract
- Highly effective through micro-membrane nebulization (mesh-technology)
- Particularly potent due to the high content of respirable aerosol
- Includes accessories: Inhaler with mask and mouthpiece for children and adults
- Certified medical product*

* Certified according to MDD (Medical Device Directive) guidelines ** Source: Global Asthma Report 2014

Kim, 34, and Paul, 42, love the good feeling of a healthy home.

How can I boost my
“feel-good experience”
at home?

Wholesome ambient air –
Made for Life.

A healthy life, a healthy home. Home is the place where you are at ease, at peace and totally yourself. Increasingly, homes are being designed and adapted to fulfil health-promoting criteria and intensify the sense of well-being they provide. Our innovative products help people to breathe easy and relax. They create a pleasurable feel-good atmosphere that lifts the spirits and boosts feeling healthy.

Healthy ambient air enhances your quality of life.

NEW **DH 600**
Dehumidifier (compact)

- Compact dehumidifier for small rooms up to 10 m²
- Eco-friendly, compressor-free Peltier-technology
- Max. dehumidification per day: 300 ml
- Reliable automatic shut-off when tank is full

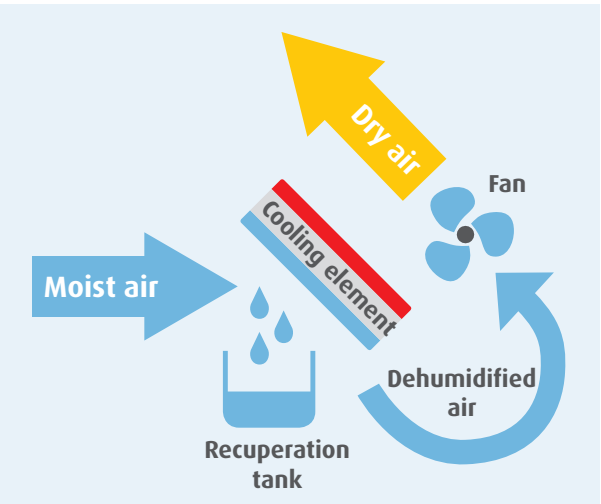

The quality of indoor air plays an important part in our health.

High humidity increases transpiration and hinders body temperature regulation. Thus we feel uncomfortable in our own skin. At the same time, high humidity has adverse effects on our health. Mould spores develop on the walls. These spores are health hazards if they enter the airways, especially for those with breathing difficulties.

Lower health risks. Increase well-being.

The compact dehumidifier DH 600 reliably promotes the reduction of moisture and mould in small rooms. Noiselessly and without environmental impact, thanks to its compressor-free Peltier technology, electric cooling elements replacing environmentally harmful refrigerants.

The Peltier effect

Ideal air humidity in living and sleeping space is between 40 and 60 %. Our dehumidifier DH 610 helps to reach this ideal level – quickly and effectively.

Good air is the perfect mix of climate and humidity. An example: A living room should be 20 – 23° warm and its humidity at 60 %. Why? This keeps our mucous membranes moist and we feel comfortable and healthy. The dehumidifier DH 610 creates a balanced room climate in middle-sized rooms up to 25 m². Thanks to its air prefilter, it reliably helps reduce humidity and mould spores.

The ideal room climate

Room	Ideal temperature	Ideal air moisture
Bathroom	20 – 23 °C	50 – 70 %
Children's room	20 – 23 °C	40 – 60 %
Living room and work office	20 – 23 °C	40 – 60 %
Kitchen	18 – 20 °C	50 – 60 %
Bedroom	17 – 20 °C	40 – 60 %
Hall	15 – 18 °C	40 – 60 %
Basement	10 – 15 °C	50 – 65 %

Source: Verbraucherzentrale (Germany)

NEW **DH 610**
Dehumidifier (medium)

- Compact dehumidifier with air prefilter for middle-sized rooms up to 25 m²
- Eco-friendly, compressor-free Peltier-technology
- Max. dehumidification per day: 750 ml
- Reliable automatic shut-off when tank is full

Annika, 33, enjoys the ideal room climate.

Let us help you breathe easy.

Ambient air that is too dry or humid can be very uncomfortable – and unhealthy.

American surveys have shown that the risk of contracting a specific flu virus was three times higher at a relative humidity under 35 % than at the ideal 50 %.

The humidifier AH 670 enhances well-being in your own four walls. It improves the air through ultrasonic technology and its wellness lighting adds to the pleasurable atmosphere. Fragrant oils can also be used for an even more relaxing effect.

Including remote control!

Annika, 33, feels good all over.

NEW AH 670 Humidifier

- Ultrasonic humidifier for improving room air
- Mood-lifting wellness lighting
- Compartment for fragrant oils

Kim, 34, and Paul, 42, love to relax with aromatic fragrances.

Fragrances go through the nose straight to the brain. And have a positive effect on body, mind and soul.

Essential oils are won through steam distillation and released into the air through a vapour diffuser. The aroma diffuser AD 635 employs ultrasound to create a fine mist that distributes the fragrance evenly throughout the room. At the same time, its wellness lighting in six colours visually enhances the mood and relaxes the senses.

NEW AD 635 Aroma diffusor

- Made of high-quality frosted glass
- Employs ultrasonic technology for micro-fine, fragrant mist
- Ambient lighting, changing between six colours
- Automatic shut-off when tank is empty

AH 670

How can I improve my well-being?

Annika, 33, enjoys feeling at ease, all by herself.

Sophisticated wellness products – Made for Life.

“Relax yourself” is the title of a study on stress that was conducted in Germany 2016. Everyone knows about stress in their own everyday – and that it can be unavoidable at times. But it does not have to end in ailments or diseases that impair your quality of life. For a great majority, regularly taking some time out to unwind and come back down is a fundamental desire. MEDISANA – being the market leader for massage products, built the experience and know-how to bring you sophisticated wellness products that fulfil your relaxation needs and your wish to lean back and loosen up.

* GfK 2017 Panel market massage.

Wellness at home.

A shiatsu massage exerts pressure on specific energy points along the body. The aim: relaxation and slowing down heart rate and rhythm of breathing.

Our Relax chair, for a shiatsu massage at any time, and in the comfort of your home.

An eye-catcher in any room – even without massage function

What exactly is “wellness design”? The 2in1 Relax chair RC 410 gives you the answer at first glance. Our cantilever chair is an eye-catcher in any room, finely designed with high-quality materials.

Design meets wellness.

A massage for targeted relaxation, as you like it. You have the choice of shiatsu and spot massage in two different massage intensities, in the zone of your choice (full, upper or lower back). Optionally, you can switch on the heat function and let the soothing warmth further relax and comfort your muscles.

RC 410 2in1 Relax chair

- 2 massage types for the back area: shiatsu and spot massage
- 3 massage zone settings: full, upper or lower back
- Optional heat function
- Soft cushioning for sitting comfort

RC 420 2in1 Relax chair in faux leather

- 3 massage types for the back area: shiatsu, rolling and spot massage
- 3 massage zone settings: full, upper or lower back
- Optional heat function
- Soft cushioning and upholstery in faux leather for sitting comfort

Melanie, 38, enjoys her full shiatsu treatment every day.

What ailments can shiatsu massage help relieve?

Simply sit down, relax and feel right at ease with the full shiatsu programme.

The aim of a shiatsu massage is to slow down your heart rate and breathing; you come to rest and relax. That is why a shiatsu massage is not only helpful when treating physical ailments, but stress or insomnia as well.

The 2in1 Relax chair RC 420, upholstered in smart-looking faux leather, has soft padding and an ergonomic design to gently support your spine. It features three different massage types: shiatsu, rolling and spot massage, all selectable in two massage intensities as well as an optional heat function.

Good-bye tension – hello relaxation.

Almost seven out of ten people who work in an office suffer from back pain. Reason enough to get pro-active and do something about it yourself. Our massage seat cushions bring targeted relief and relaxation to the comfort and privacy of your home.

Nowadays most people are under numerous kinds of stress, and the problem often manifests itself as tension, in the back, shoulders or neck. One solution: a shiatsu massage as a good source of effective – and pleasurable – relief. Our massage seat cushion MC 826 combines three different massage techniques: shiatsu, spot and acupressure.

Vitalising your sense of well-being.

The various massages and programs reliably provide relief from stress, aches and knots. The new spot massage function targets tension in your back and the vibration massage loosens up the buttocks and thighs. Acupressure stimulates circulation in the waist.

HEIGHT ADJUSTABLE
PER REMOTE CONTROL
**NECK
MASSAGE**

MC 826 Shiatsu massage seat cushion

- 3 massage zones for shiatsu and tapping: full, upper or lower back
- 3 tapping massage levels in the back zone
- 3 acupressure massage levels in the waist zone

The new rocking technology perfectly adapts to your spine during your massage.

Annika, 33, can feel the massage gently relieve the tension in her back.

Poor posture leads to muscle tension, which leads to knots, aches and pains. Our solution: The massage seat cushion MC 824 with revolutionary rocking technology.

The most important aspect of treating muscle tension and knots is to release blockages in the body. Thanks to its innovative rocking technology, the massage seat cushion MC 824 adapts to your spine's every curve to ensure the perfect massage.

MC 824 Shiatsu massage seat cushion

- Innovative rocking technology for a soothing massage along the contours of the spine
- 3 massage zones for shiatsu and spot massage: full, upper or lower back
- Choice of intensive shiatsu, rolling or spot massage in the back zone
- Body-scan function detects reaching the shoulders and automatically reverses back down

Tension-free.

All three massage styles work gently yet intensely to loosen and stretch the tissues of your back muscles. The MC 824 makes it easy to find your personal balance between relaxation and invigoration, boosting tranquility and well-being.

Strong back, gentle massage.

Maintain a comfortable posture. A relaxed back boosts concentration and performance.

Bed rest used to be the remedy of choice for backache. Today we know that a gentle combined therapy of massage and exercise brings better relief, and also prevents further tension and pain. Why not treat yourself to a massage with added comfort?

Relax, strengthen, regenerate. And enjoy.

The MC 818 promotes circulation through its intense tapping massage in two intensities and promotes muscle relaxation throughout the entire back. Red light and heating are further options to make the most of your massage.

MC 818 Tapping massage seat cushion

- Tapping massage for the entire back in 2 intensities
- 3 massage zones for tapping massage: full, upper or lower back
- Optional targeted spot massage
- Optional red light and heat functions

Home is where you feel most at ease.

78 % A recent survey showed that most people enjoy relaxing at home. Their favourites are watching TV, surfing the Web, reading.

Only **10 %** relax with a massage. What about you?

Source: statista GmbH

Treat yourself and your back to some special relaxation at home.

Lots of people enjoy relaxing at home on the sofa, but why not combine being a couch potato with couch wellness? Easy enough and a pleasure as well with our shiatsu massage seat cushion MC 815: Four rotating massage heads create a deep, kneading massage that promotes circulation, regenerates body and spirit, and stabilises the back. Active relaxation the easy way. And no need for a guilty conscience: A relaxed back boosts your concentration and performance. From now on, active and lasting relaxation can be the perfect leisure time pursuit.

MC 815 Shiatsu massage seat cushion

- 3 massage zones: full, upper or lower back
- Optional vibration massage function in the seat
- 4 rotating massage heads
- Optional red light and heat functions

When stress becomes
a pain in the neck.

Neck pain is a tell-tale warning sign of stress. Tenseness soon turns into tension – and both slow down your mind as well as your upper body.

At the end of a long day people often find their bodies telling them they have had enough. Tension in the neck and shoulders increases and becomes distinctly painful.

A little time-out
from stress.

The body and mind react sensitively to stress. It is the same with poor posture, or not enough exercise; they all lead to tension. We sit too much, in the wrong way and move too little. The shiatsu neck massager NM 880 brings you relief, and a little time out from stress. Its three intensity settings allow for easy regulation and the perfect massage.

CORDLESS
RECHARGEABLE

NEW NM 880
Shiatsu neck massager

- Cordless shiatsu neck massager with integrated battery
- Relaxing shiatsu massage for the neck
- Optional red light and heat functions

Intensive
HEAT THERAPY
FUNCTION

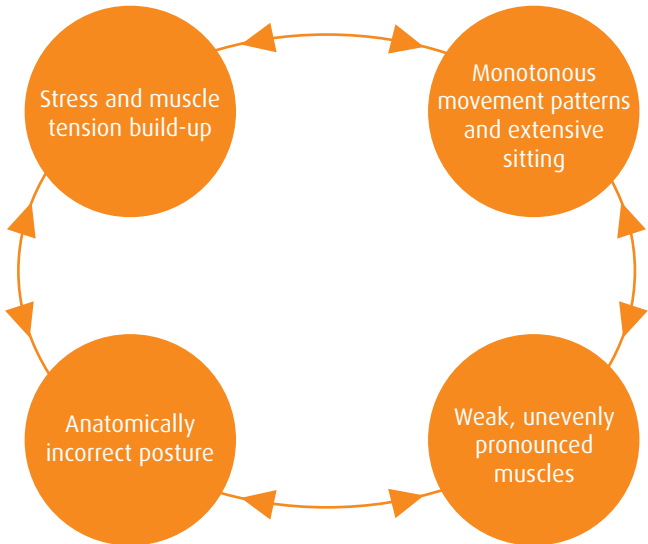

NEW NM 866
Neck massager

- Optional intensive heat function (with AC power supply)
- Vibrating massage for neck and shoulders
- Ideal for at home and on the go

Annika, 33, enjoys a neck massage to take away stress of the day.

The vicious circle of neck pain

A vibrating massage is the perfect treatment for tensions and deeper-seated muscle knots.

The NM 866 combines vibration and heat to create a gentle agitation of the muscles that releases tension and cramps, penetrating deep into the muscle tissue.

If you are prone to quickly experiencing neck pain and tension, then the NM 866 provides both perfect prevention and relief. It is lightweight and easy to use, at home or while travelling.

The human body is composed of hundreds of muscles, and the feet are part of it. Their muscles can become tense and ache from the demands of the day too, and a foot massage in the evening boosts your vigour and vitality, as well as your spirits.

A foot massage brings you relief after a long day on your feet. It stimulates your circulation, loosens up and relaxes the muscles of your feet, and has a soothing effect on tense and aching muscle groups. Our FM 888 offers different reflex zone massages, such as shiatsu and compression massage. The result: All the benefits of a truly comprehensive massage

Vitalising and relaxing.

experience. The muscles in the feet relax, the nerve endings in the feet are stimulated and a soothing, pampered feeling spreads through the whole body.

FM 888
Shiatsu foot massager

- Intensive reflex zone massage
- Choice of 2 different massage techniques
- Shiatsu massage on the soles and heels
- Compression massage on the tops of the feet

Happy feet make
happy people.

Treating your feet to a massage is treating your whole body well. A shiatsu foot reflex zone massage brings lasting effects.

If your feet are relaxed, your whole body is relaxed. A foot reflex zone massage makes the most of this effect by stimulating and activating individual energy points and entire meridians in the feet.

Bliss for the body
and mind.

Our shiatsu foot massager FM 885 works intensively on the soles and heels, while the tops of the feet are indulged to a three-level compression massage. The effect is more than just intensely pleasing: The combined massage improves circulation and the whole body feels refreshed and relaxed.

FM 885
Shiatsu foot massager

- Shiatsu massage on the soles and heels
- 3-level compression massage on the tops of the feet
- Optional heat function in the shiatsu massage heads

Annika, 33, knows how to take care of her feet and herself at the end of a long day.

Heat can work wonders.

Wellness heat is totally versatile. It calms and relaxes, it invigorates and soothes. When applied properly, it brings moments of relaxation and regeneration.

Heat is one of the oldest forms of physical treatment. Heat affects the whole body, but it can also be used to target specific areas. It calms and relaxes, stimulates the immune system and alleviates pain. Warmth improves circulation and so enhances metabolic processes. The body is better supplied with oxygen and nutrients.

The heat cape HP 626 targets tension in the neck and shoulders. The turbo-heat function warms up quickly to loosen muscles and

Heat invigorates, relaxes
regenerates and soothes.

release blockages. But heat does more: It affects a soothing sense of comfort and well-being. The cosy heating blanket HDW surround you with the perfect degree of warmth on cold days. A pleasure for the body and spirit.

Kim, 32, enjoys the cold days.

Paul, 42, looks forward to time spent together.

HP 626 Cordless heat cape

- Suitable for indoor and outdoor use
- 4 temperature settings
- Integrated battery life approx. 5 hrs.

HDW Cosy heating blanket

- Flexible heating wire and matrix sensor system for even heat distribution

What supports and challenges my body?

Svenja, 27, loves the feel of her muscles tensing and relaxing during her workout.

Equipment for sports –
Made for Life.

Exercise, exercise and more exercise. It is a question of attitude as much as it is the fundamental prerequisite for a healthy life. After all, the human body is designed to move all day. That is why it suffers from lack of exercise, especially the fascias that stabilise the muscles and body. Our products help you to easily integrate an effective workout into your daily life.

The relaxation programme for your fascias.

Whether as a preparation for your workout or to relax afterwards,
the PowerRoll activates and regenerates muscles with a lasting effect.

Athletes know: Every good workout includes an extensive warm-up before, and a thorough cool-down after. That improves circulation to the muscles and loosens them up.

Regeneration and strengthening all in one.

The PowerRoll not only activates and regenerates the muscles, it is perfect for strength and stability exercises as well. Its eight intensity levels optimally reach even deep-seated muscle groups.

New
SURFACE
STRUCTURE

NEW PowerRoll Classic (length: 31 cm)
PowerRoll XT (length: 45 cm)
Fascia rolls

- Vibrating effect to reach deep-seated muscle tissues
- New surface structure to support localised self-massage and increase circulation
- Includes training QR-Code & training plan
- 8 intensity levels
- Integrated rechargeable battery

The unique surface structure of the PowerRoll XT and Classic brings your fascia workout to the next level.

Fascias.

Your body's elastic shock absorbers for every move.

The tensile strength of fascia bands, just millimetres thin, is over 60 kg. Reason enough to stretch them and keep them supple.

Bear in mind while working out:

Muscles that tend to lose tone need more strengthening. Muscles that tend to shorten, need stretching. It is all about the mix – and the right training equipment.

Fascias thrive under pressure.

Fascia training has never been so pleasant, easy and effective. The PowerRoll XT Ultrasoft massages, stimulates and trains your muscles and connective tissue at your choice of eight different vibration intensities, reliably reaching even deeper-seated muscles.

Level of hardness
**ULTRA
SOFT**

NEW

PowerRoll XT ULTRA SOFT Fascia roll

- Vibrating effect to reach deep-seated muscle tissues
- For activation and regeneration
- For strengthening and stabilising exercises as well as fascia training
- 8 intensity levels
- Integrated rechargeable battery

Muscle tension relief where and how you need it.

Targeted treatment of muscle tension right in your own hands.

Muscle tension is uncomfortable, even painful. When the muscles and fascias harden, muscle relaxation is diminished. Moreover, supple fascias are the fundamental basis for overall fitness good posture, after all they surround the muscles and relay their strength throughout our bodies.

Targeted tension relief.

The MEDISANA VibrationBall makes the targeted relief of muscle knots and tension easier than ever. Four intensity levels ensure that even deeper-seated muscle tissues are affected.

Back view

Functional
DESIGN

VibrationBall Fascia ball

- Especially suited for localised self-massage
- For a targeted use on fascias, trigger points and muscles
- For extended applications, e.g. on arms, legs etc.
- 4 different intensity strengths
- Integrated rechargeable battery

NEW

Muscle gain in its simplest form.

Electrostimulation is perfect for the targeted training and regeneration of the lower back muscles. It is the ideal supplemental workout for anyone with a sedentary job.

It is not always easy to find time at home for a thorough workout, and it is the lower back that suffers most from lack of exercise and sitting much too much in the everyday. The EMS Hip Trainer is the ideal supplement for your workout.

Stimulating training for hip and back muscles.

The EMS Hip Trainer's ergonomic cushioning design ensures perfect fit and secure positioning on the hips. Muscles are actively stimulated according to your choice of two programmes and 15 intensity levels; you have the intensity of your workout right in your hand.

The EMS Body Trainer's plus: The localised treatment of individual muscle groups.

Electrostimulation is the ideal method for a gentle and targeted muscle gain.

Seven muscle groups support our abdomen and keep it in shape, but sitting too much diminishes abdominal muscle strength and tone. The EMS Body Trainer has 15 intensity levels to gently and effectively stimulate the muscles of the abdomen, legs and arms. The advantage: Electrostimulation has long proven itself in physiotherapy, as the muscles cannot be overexerted. The result: Effective muscle gain combined with targeted relief from muscle knots and tension.

NEW

EMS Body Trainer

- Supports a targeted muscle gain
- Automatic programmes: Massage, acupuncture, tapping and combinations thereof
- Set of 3: 1 abdominal pad and 2 leg / upper arm pads
- Training programmes end automatically after 23 minutes

EMS Hip Trainer

- Ergonomic cushioning design for excellent positioning and fit
- The ideal supplement for home workouts
- To built up targeted muscles
- Training programmes end automatically after 25 minutes

AM 880
Abdominal muscle stimulator

50 intensity levels

- Flexible Neoprene waist belt with incorporated electrodes
- Choice of 6 abdominal muscle training programmes (3 á 25 min, 3 á 30 min)
- Intensity can be set over 50 levels
- Can be worn under clothing thanks to the flat design

Technical data

- Automatic switch-off at the end of the programme
- Simple operation with a large LCD display
- Device is integrated into the belt
- 1 channel with 4 electrodes
- Waist belt with Velcro closer
- Incl. extension belt for waist circumference up to 140 cm
- Water contact electrodes, no need for contact gel
- Incl. 3 batteries (1.5V AAA)

Size:	approx. 110×16×3 cm
Weight:	approx. 0.37 kg
Battery:	3×1,5V (AAA)
Channels:	1
Curve form:	Bi-phase square wave pulse
Intensity:	0–70mA
Frequency:	30–90 Hz
Pulse width:	200–300 µs
Article No.:	88322
EAN:	40 15588 88322 4
Warranty:	3 Years

VIFIT TOUCH
Activity tracker

Activity and sleep tracker in one

- High-quality OLED display
- Displays incoming calls or messages
- Stores the results of the last 15 days
- Individual daily goals and movement reminder
- Data transfer via Bluetooth® Smart (4.0) to the VitaDock+ app for iOS and Android*

Technical data

- Activity mode: Tracks steps, distance, burned calories, activity time in hours and daily target in %
- Sleep mode: Tracks movement activity during sleep and duration of sleep
- Motion sensor for activity measurement: counts actual steps
- Splash proof
- Vibration alarm clock
- Battery life: 5 – 7 days
- Rechargeable Lithium-Ion battery
- Display of time, date and battery indicator
- Incl. USB cable

Size:	approx. 2.3×2×0.9 cm
Weight:	approx. 22 g
Battery:	Lithium-ion battery
Article No.:	79486
EAN:	40 15588 79486 5
Warranty:	3 Years

*Bluetooth® 4.0 compatible with VitaDock+ App as of Apple (iOS 7.0), iPhone® 4s, iPod Touch® (as of 4 Gen.), iPad 3, as of Android 4.3

How much **Care** do I need for my
personal „well-being“?

Laura, 32, feels well-groomed and attractive.

Clever personal
care products –
Made for Life.

“I feel good in my skin”. To a lot of people this transcribes into doing something good for their bodies. Fitness, wellness, but personal care as well. That is because a pampered, well-cared for body always brings with it a sense of happiness, and that holds true for women and men alike. Every second woman, and now also every second man, take an active, intensive interest in personal care. MEDISANA provides personal care products that offer a maximum of well-being, comfort, and thus, an inherent sense of happiness that will enrich your everyday.

Beauty comes from within and shines out to the world.

When do you feel beautiful? To most, beauty means being healthy and well-groomed.

Three highlights for daily care.

A large survey of 11,000 women on the topic of beauty shows that women feel attractive when they feel healthy. That includes feeling confident in their appearance and grooming. And personal care can be so easy with our products.

For example, the DC 300 LED light therapy pen combines two therapies in one small pen. Just using it for five minutes twice a day gives your skin a radiating glow. Red light helps reduce inflammation, blue light improves the appearance of the skin. Or our cosmetic mirror CM 850. It magnifies 5-fold and its soft LED lighting guarantees your reflection is perfect. It adheres strongly and safely to all smooth surfaces and will prove itself the perfect companion in the bath or on travels.

NEW **CM 850**
LED suction mirror

- Strongly adheres to all smooth surfaces
- Bright adjustable LED lighting
- Large diameter (approx. 19 cm)
- 5-fold magnification

LED lighting for even illumination.

NEW **MP 810**
Manicure pedicure set

- Care and treatment of nails, cuticles and callused skin
- Simple operation, easy exchange of attachments
- Light and very powerful
- Removes cuticles; files, forms, smooths and polishes nails

Remove cuticles as well as file, form, smooth and polish nails. Gently and with a lasting effect.

FIVE
different
ATTACHMENTS

Well-groomed nails enhance well-being at any age.

Naturally groomed finger and toe nails are definitely in trend, and not just for women. Studies have shown that every second woman finds well-groomed finger and toe nails an attractive attribute in men. MEDISANA's manicure and pedicure instrument MP 810 and its five high-quality attachments gently and thoroughly groom nails, cuticles and callused skin. Not only instantly perfecting your appearance, but also protecting against future discolouration, deformation and brittle nails.

NEW **DC 300**
LED light therapy

- Light therapy in a convenient form
- 2 therapies in one device
- Blue light to improve acne
- Red light reduces skin inflammation

Red light helps reduce inflammation, blue light improves the appearance of the skin.

IPL 850
Hair removal system

- High-quality quartz cartridge with 200,000 flashes**
- Effective technology for permanent hair reduction
 - Suitable for arms, legs, underarms, bikini zone, back and chest
 - Automatic skin tone sensor in 6 light intensity levels (4 manually selectable levels)
 - LCD display shows the adjusted energy intensity as well as the number of used light pulses

- Technical data**
- Long-life quartz cartridge with 200,000 light pulses
 - Disables the hair root deep under the skin and prevents further hair growth
 - Easy and safe to use at home
 - Safe and effective for the treatment of skin types I – VII and black to red hair
 - Integrated UV filter
 - Flash-glide function for comfortable use
 - Sensor starts treatment when skin contact is made
 - Automatic shut-off after 3 min.
 - Spare cartridge:

ND 870
UV nail hardener

Professional nail design for home use

- Ideal for the hardening of gel and liquid acrylic
- 360 degree reflective coating for an even curing
- Easy operation thanks to 4-step timer (90sec / 120sec / 30min / 60min)

Technical data

- Detachable floor section for an easy lamp replacement
- 4 non-slip rubber feet for a firm standing

Size: approx. 25.3×22.1×11.3 mm
Weight: approx. 1.036 kg
Power supply: 220-240V~ 50/60 Hz; 36W
Bulb wave length: λ=365 nm
Article No.: 85470
EAN: 40 15588 85470 5
Warranty: 3 Years

NP 860
Electric nail polisher

Long lasting shine without chemicals

- For glossy, natural-looking nails
- Professional nail care at home
- Durable nail gloss (without additional care products)

Technical data

- Simple to use on fingernails and toenails
- Small and handy – ideal for on the go
- 2 speed levels for individual needs of nail care
- Ergonomic design
- Smoothing and polishing – in two steps to nails with “Wow” effect
- Incl. batteries (2 x 1.5V AA)

Including 2 smoothing and polishing rollers

Size: approx. 15.5×3.6×3.3 cm
Weight: approx. 0.15 kg (incl. batt.)
Batteries: 2 x 1.5V (AA)
Rotation speed: 2 levels: 2,000/2,500 U/min
Article No.: 85160
EAN: 40 15588 85160 5
Warranty: 3 Years

CM 850
LED suction mirror

Extra large and bright

- Strong adhesion on all smooth surfaces
- Bright LED illumination
- Diameter of mirror approx. 19 cm
- 5 x magnification

Technical data

- Suction enhancement thanks to special coating
- Removable and swivelling
- Battery powered
- Telescope bracket
- Incl. batteries (3 × 1.5V AAA)

Size: approx. 20×10×20 cm
Weight: approx. 0.3 kg
Diameter of mirror: approx. ø 19 cm
Batteries: 3×1.5V (AAA)
Article No.: 88558
EAN: 40 15588 88558 7
Warranty: 3 Years

CM 840
2in1 Cosmetic mirror

Our bestseller

- Illuminated cosmetic mirror
- 2 swivelling mirrors: Normal and 5x magnification
- Uniform ring illumination with 18 LED-lights
- Diameter of mirror approx. 13 cm

Technical data

- High-quality chrome finish
- Stable base
- Incl. batteries (4 x 1.5V AAA)

Size: approx. 20.5×13.5×31.5 cm
Weight: approx. 0.95 kg
Diameter of mirror: approx. ø 13 cm
Batteries: 4 x 1.5V (AAA)
Article No.: 88550
EAN: 40 15588 88550 1
Warranty: 3 Years

CM 835
Cosmetic mirror

Compact and stable

- Illuminated cosmetic mirror
- 2 swivelling mirrors: Normal and 5x magnification
- Uniform ring illumination with 12 white LED-lights
- Diameter of mirror approx. 12 cm

Technical data

- High-quality chrome finish
- Stable base
- Incl. batteries (3 x 1.5V AAA)

Size: approx. 16.9×8×19 cm
Weight: approx. 0.375 kg
Diameter of mirror: approx. ø 12 cm
Batteries: 3 x 1.5V (AAA)
Article No.: 88554
EAN: 40 15588 88554 9
Warranty: 3 Years
